XANTHAN GUM (E415)

NATUURLIJK NATUURLIJK PRODUCT CODE:
X1527, X1528, X1529

PRODUCTION:
1111607

1. PRODUCT IDENTIFICATION

1.1 Supplier product information

Product name	Xanthan gum		
Production	1111607		
Product code	Content	EAN	Packaging
X1527	60g	8718309860298	Plastic jar and screw lock cap with warranty seal. Jar = Cap =
X1528	150g	8718309830304	
X1529	700g	8718309830311	

1.2 Scientific product information

Single ingredient

Main use	Thickener, stabilizer, emulsifier
Chemical name	Xanthan gum
Chemical formula	C ₃₅ H ₄₉ O ₂₉
Production method	Xanthan gum is a polysaccharide produced via bacterial fermentation of carbohydrates with pure cultures of the organism Xanthomonas campestris. After the fermentation period the xanthan gum is washed out, dried and ground into a fine powder.

1.3 Legislative product information

CAS number	11138-66-2		
EU food additive	E415		
Country of Origin	China		

2. PRODUCT INFORMATION

2.1 Physical and Chemical properties

	Unit	Specification	Method
Appearance		fine powder	
Colour		cream	
Odour/taste		odorless	
Purity	%	93	
Solubility		completely in hot en cold water	
Viscosity, dynamic	mPa.s	1400	1% gum in 1% KCl (60 rpm)
pH		7	1% solution

3.2 Suitability for other diets:

Coeliacs	✓	Lactose intolerant	✓
Halal	✓	Vegans	✓
Kosher	✓	Vegetarian	✓

3.3 GMO Declaration:

Xanthan gum does not contain genetically modified organisms and is not produced using raw materials of a genetically modified origin. At no stage during production does the product come into contact with genetically modified organisms.

4. STORAGE CONDITIONS

Storage conditions	In closed original packaging. Must be kept cool and dry in a well-ventilated place.
Shelf life	60 months after production, under the above mentioned conditions.

5. FOOD SAFETY

5.1 Hygiene:

This product is produced in a facility with an on HACCP based food safety system.

5.2 Identifications of dangers:

Classification of the substance (Regulation (EC) No 1272/2008)	Not classified (non-hazardous)

6. EXTENDED PRODUCT INFORMATION

6.1 Usage

Purpose	<ul style="list-style-type: none">- Increases the viscosity- Prevent oil separation by stabilizing the emulsion- Suspend solid particles in a fluid- Replace gluten in gluten free products
Dispersion/Hydration	Xanthan gum will hydrate in most hot and cold water-based systems, as it is completely soluble in both. Sifting dry xanthan gum into water with sufficient agitation to bring about a physical separation of the particles allows composition of solutions. Xanthan gum can be pre-dispersed with a water miscible solvent, such as a glycol or alcohol, or vegetable oil prior to being added to the water phase. Xanthan gum can likewise be pre-dispersed dry by mixing with a powder such as sugar before dispersion.
Dosage	0,5 tot 1,0%
